Anthony Gruber, Ph.D.

https://agrubertx.github.io | adgrube@sandia.gov | +1-512-658-9672

Albuquerque, NM 87111

Education

Ph.D., Mathematics, Texas Tech University, Lubbock, TX 2019

M.S., Mathematics, Texas Tech University, Lubbock, TX 2017

B.G.S., Music Performance/Chemistry/Mathematics,
Texas Tech University, Lubbock, TX 2015

Professional Experience

Sandia National Laboratories Albuquerque, NM
Senior Member of Technical Staff *Sep 2024–Present*

- Conducting research in applied mathematics with emphasis on structure-preserving and variational approaches.
- Regularly publishing findings in high-impact journals, presenting at international conferences, and mentoring graduate students.

John von Neumann Fellow *Sep 2022–Sep 2024*

- Led self-directed research funded by DOE ASCR and Sandia LDRD programs.
- Developed nonintrusive and variationally consistent methods for surrogate modeling and graph information processing.
- Collaborated with and advised by Pavel Bochev, Nat Trask, and Irina Tezaur.

Florida State University Tallahassee, FL and Columbia, SC
Postdoctoral Research Associate *Jan 2021–Aug 2022*

- Designed algorithms for function approximation and reduced-order modeling related to ocean dynamics simulations.
- Collaborated with and advised by Prof. Max Gunzburger (FSU), Prof. Lili Ju, and Prof. Zhu Wang (University of South Carolina).
- Funded by DOE grant DE-SC0020418: Efficient and Scalable Time-Stepping Algorithms and Reduced-Order Modeling for Ocean System Simulations.

Texas Tech University Lubbock, TX and San José, Costa Rica
Assistant Professor of Practice *Aug 2019–Dec 2020**

- Directed the mathematics program at TTU's satellite campus in Costa Rica.
- Taught a 2-2 load of mathematics courses, conducted research, and coordinated with TTU faculty and administration state-side to further the University mission in Costa Rica.
- *Remained employed on unpaid leave until Aug. 2022.

Graduate Part-Time Instructor *Aug 2015–Aug 2019*

- Served as instructor of record for a 2-2 load of mathematics courses annually.
- Responsible for all aspects of instruction, including writing/delivering lectures, assigning homework, and writing/grading exams.
- Funded through scholarships and endowments at TTU.

Oak Ridge National Laboratory Oak Ridge, TN
NSF Graduate Research Fellow *June 2018–Aug 2018*

- Developed "active manifolds" (see publications below) under Dr. Robert Bridges, applying geometric methods to high-dimensional function approximation problems.
- Produced mathematical and computational results specially selected for presentation to the leaders of the Computing and Computational Sciences Division at ORNL.
- Funded through the NSF Mathematical Sciences Graduate Internship (NSF MSGI) program.

University of Texas at Dallas Richardson, TX
NSF Research Intern *May 2014–Aug 2014*

- Worked under Prof. Manuel Quevedo to design, construct, and characterize TiSi and CrB2-Si-SiC thin-film resistors (TFRs) using a combination of lithography, x-ray photoelectron spectrometry, and Hall-effect measurements.
- Improved resistivity of previous thin-film resistors by 30% through optimized Ti:Si ratios.
- Funded through the NSF Research Experiences for Undergraduates (NSF REU) program.

Research Awards and Funding

PI, "Learning Operators for Structure-Informed Surrogate Models", Sandia LDRD award. 2022-2024

Awardee, John von Neumann Fellowship 2022-2024

Awardee, NSF Mathematical Sciences Graduate Internship 2018

Awardee, NSF REU Internship 2014

Leadership, Mentoring, and Professional Service

Formal Mentoring: Served as formally designated mentor/advisor with documented role.

- Ritoban Roy-Chowdhury (6/2025–Present), M2dt summer undergraduate intern, UC San Diego.
  Project: Learning phase-field models with Onsager's variational principle.
- Tage Burnett (5/2025–8/2025), SEA-CROGS summer graduate intern, Georgia Tech.
  Project: Structure-preserving ROMs for PIC methods.
- Arjun Vijaywargia (6/2024–5/2025), M2dt year-round graduate intern, Peter O'Donnell postdoc at UT Austin.
  Project: Tensor parametric Hamiltonian operator inference.
- Ian Moore (6/2024–Present), M2dt year-round graduate intern, Virginia Tech.
  Project: Schwarz coupling of operator inference models for convection-dominated physics.
- Ph.D. committee member for Madusha Atampalage (graduated Aug. 2021), Texas Tech.
  Thesis: Topics in Minimal Surfaces and Applications.

Informal Mentoring: Contributed substantially to mentee's professional development without formal documentation.

- Adrienne Propp (3/2024–Present), SEA-CROGS graduate intern, Stanford University.
  Project: Bracket-based graph neural networks for modeling ice sheets.
- Sohyeon Jung (8/2024–Present), Ph.D. student with Kookjin Lee at Arizona State University.
  Project: Model reduction with neural metriplectic systems.
- Rishi Pawar (Summers 2023–2025), CSRI summer graduate intern, University of Arizona.
  Project: Interfacial flux prediction using neural ODEs and operator inference.

- Roxana Pohlmann (9/2023–1/2024), Visiting graduate student intern, TU Wien.
  Project: Reduced-order models to accelerate injection molding.
- Edward Huynh (5/2023–8/2023), CSRI summer graduate intern, University of Texas at Austin.
  Project: Obtaining inverse Sobolev-type inequalities for tanh neural networks.
- Yuankai Teng (1/2021–8/2022), Ph.D. student at University of South Carolina, now Quantitative Analytics Specialist at Wells Fargo.
  Thesis: Deep learning methods for some problems in scientific computing.

Conferences/Minisymposia Organized

8. "Geometric Mechanics Formulations and Structure-Preserving Discretizations for Models of Physical Systems" *Minisymposium*, 18th U.S. National Congress on Computational Mechanics, July 20–24, 2025.
7. "Intersections of Scientific Machine Learning and Classical Computational Approaches" *Minisymposium*, 18th U.S. National Congress on Computational Mechanics, July 20–24, 2025.
6. "Structure-Preserving Model Reduction for Large-Scale Systems" *Minisymposium*, SIAM Computational Science and Engineering, March 3–7, 2025.
5. "Geometric Mechanics Formulations and Structure-Preserving Discretizations for Models of Physical Systems" *Minisymposium*, SIAM Joint Mathematics Meetings, January 8–11, 2025.
4. "Advances in Machine Learning on Graphs for Physical Sciences and Data Analysis" *Minisymposium*, SIAM Mathematics of Data Science, October 21–25, 2024.
3. "Geometric Mechanics Formulations and Structure-Preserving Discretizations for Continuum Mechanics and Kinetic Models" *Minisymposium*, 16th World Congress on Computational Mechanics, July 21–26, 2024.
2. "Geometric Mechanics Formulations and Structure-Preserving Discretizations for Continuum Mechanics" *Minisymposium*, 17th U.S. National Congress on Computational Mechanics, July 26–30, 2023.
1. "Elastic Curves and Surfaces with Applications and Numerical Representations" *Special Session #54*, 18th International Conference of Numerical Analysis and Applied Mathematics, September 17–23, 2020.

Editorial and Review Activities

- Reviewer for journals including: *SIAM Journal of* {*Scientific Computing, Uncertainty Quantification, Applied Mathematics*}, *Computer Methods in Applied Mechanics and Engineering*, *Journal of Computational Physics*, *Journal of Scientific Computing*, *Physical Review* {*A, E*}, *Journal of Geometry and Physics*, *Journal für die reine und angewandte Mathematik (Crelle's Journal)*, *Electronic Journal of Statistics*, *Technometrics*, *Journal of Machine Learning for Modeling and Computing*, *Neural Networks*, *Geoscientific Model Development*.
- Reviewer for conferences including: *NeurIPS*, *ICML*, *ICLR*, *AISTATS*.
- Reviewer for Sandia CSRI Summer Proceedings (since 2023).

Panels and Outreach

- Panel Member, Alumni Panel (virtual), NSF-MSGI Virtual Symposium. (August 23, 2023)
- Panel Member, Early Career Panel (virtual), Association of Women in Mathematics, Texas Tech University, Lubbock, TX. (April 21, 2022)

Teaching

- *Advanced Calculus I* (400 level)
  - One section, Fall 2020 (TTU-CR).
- *Foundations of Algebra I* (300 level)
  - One section, Fall 2020 (TTU-CR).
- *Higher Math for Engineers and Scientists II* (300 level)
  - One section, Spring 2019 (TTU-CR).
- *Higher Math for Engineers and Scientists I* (300 level)
  - Two sections, Spring 2017 (TTU).
  - Large section, Spring 2018 (TTU).
  - Virtual section, Fall 2018 (TTU).
  - One section, Spring 2020 (TTU-CR).
- *Intro to Critical Reasoning and Proof* (300 level)
  - One section, Fall 2019 (TTU-CR).
- *Calculus III with Applications* (200 level)
  - Large section, Fall 2016 (TTU).
  - Two sections, Fall 2017 (TTU).
  - Virtual section, Summer 2019 (TTU).
  - One section, Fall 2019 (TTU-CR).
  - One section, Spring 2019 (TTU).
  - One section, Fall 2020 (TTU-CR).
- *College Algebra* (100 level)
  - One section, Summer 2016 (TTU).
- *Intro to Data Analytics* (general knowledge)
  - Short course, Fall 2020 (TTU-CR).

Professional Presentations

Invited External Presentations

25. "Variational Approaches to Surrogate Modeling and Information Processing" *Santa Fe Institute Workshop on Dynamical Systems and Graph Theory Approaches to Digital Twins*, Santa Fe, NM. (40 min; Aug. 13, 2025)
24. "Model Reduction for Accelerating Bracket-Based SciML" *IVADO Workshop on Accuracy and Efficiency in SciML*, Montréal, Canada. (30 min; June 26, 2025)
23. "Bracket-Based Dynamics for Data-Driven Surrogate Modeling and SciML" *Center for Math-*

ematics and Artificial Intelligence Colloquium, George Mason University, Fairfax, VA. (50 min; March 28, 2025)

22. "Hamiltonian and Metriplectic Model Reduction" *Workshop on Geometric Mechanics Formulations for Continuum Mechanics*, Banff, Canada. (20 min; March 20, 2025)

21. "Tensor Parametric Hamiltonian Operator Inference" *Minisymposium on Recent Advances in Structure-Preserving Machine Learning and Reduced Order Modeling*, SIAM Conference on Computational Science and Engineering, Fort Worth, TX. (15 min; March 3, 2025)

20. "Structure-Informed Model Reduction of Maxwell-Type Systems" *Minisymposium on Discovering Evolution Equations Using Structure-Preserving Data-Driven Methods*, DTE & AICOMAS 2025, Paris, France. (15 min; February 19, 2025)

19. "Tensor Parametric Hamiltonian Operator Inference" *Minisymposium on Reduced Order Models for Convection-Dominated Flows: Modeling, Analysis, and Simulation*, Joint Mathematics Meetings, Seattle, WA. (30 min; January 10, 2025)

18. "Data-Driven Dynamical Systems with Structural Guarantees" *Los Alamos National Laboratory*, Los Alamos, NM. (50 min; November 19, 2024)

17. "Variationally Consistent Hamiltonian Model Reduction" *Minisymposium on Recent Advancements in Data-Driven Model Reduction: Theory, Algorithms, and Applications*, SIAM Mathematics of Data Science, Atlanta, GA. (25 min; October 21, 2024)

16. "Learning Metriplectic Systems and Other Bracket-Based Dynamics" *University of Vienna Mathematics Seminar* (virtual), Vienna, Austria. (50 min; June 19, 2024)

15. "Learning Metriplectic Systems and Other Bracket-Based Dynamics" *Minisymposium on Mathematics for Machine Learning*, Canadian Mathematical Society Summer Meeting, University of Saskatchewan, Saskatoon, Canada. (30 min; June 2, 2024)

14. "Learning Bracket-Based Dynamical Systems for Property-Preserving Model Reduction" *Guest Lecture*, University of Pennsylvania, Philadelphia, PA. (50 min; April 23, 2024)

13. "Property-Preserving Model Reduction in Bracket-Based Dynamical Systems" *Applied Math Seminar Series*, University of New Mexico, Albuquerque, NM. (50 min; March 25, 2024)

12. "Data-Driven Dynamical Systems with Structural Guarantees" *S. Scott Collis Advanced Modeling & Simulations Seminar Series* (virtual), Rio Grande Consortium for Advanced Research on Exascale Simulation. (50 min; November 10, 2023)

11. "Data-Driven Dynamical Systems with Structural Guarantees" *Applied Mathematics and Machine Learning Seminar* (virtual), Texas Tech University, Lubbock, TX. (50 min; November 8, 2023)

10. "Property-Preserving Model Reduction for Conservative and Dissipative Systems" *Numerical Analysis of Galerkin ROMs Seminar Series* (virtual), INRIA Bordeaux, France. (50 min; October 10, 2023)

9. "Data-Driven Surrogate Models for Bracket-Based Dynamical Systems" *Minisymposium on Data-Driven Methods for Circuits and Devices*, 2nd IACM Mechanistic Machine Learning and Digital Engineering for Computational Science Engineering and Technology, El Paso, TX. (20 min; September 27, 2023)

8. "Mathematics in Different Settings" *Hong Duc University Seminar* (virtual), Thanh Hóa, Vietnam. (30 min; May 20, 2023)

7. "Energetically Consistent Model Reduction for Hamiltonian and Metriplectic Systems" *CRUNCH Webinar* (virtual), Brown University, Providence, RI. (60 min; December 9, 2022)

6. "Convolutional Neural Networks for Data Compression and Reduced-Order Modeling" *Minisymposium on Machine Learning for Large-Scale Scientific Data Analytics*, SIAM Mathematics of Data Science, San Diego, CA. (25 min; September 28, 2022)

5. "Computing Quasiconformal Mappings Between Immersed Surfaces" *AMS Fall Central Sectional*, University of Texas at El Paso, El Paso, TX. (20 min; September 17, 2022)

4. "Calculus in Computer Graphics and Data Science" *Mathematics Seminar Series* (virtual), Cameron University, Lawton, OK. (50 min; October 19, 2021)

3. "Convolutional Neural Networks for Data Compression and Reduced Order Modeling" *SIAM SEAS Special Session on Deep Learning Methods for Data Driven Models*, Auburn University, Auburn, AL. (30 min; September 18, 2021)

2. "Codazzi Tensors with Parallel Mean Curvature" *AMS Special Session #1159: Geometry of Submanifolds and Integrable Systems* (virtual), University of Texas at El Paso, El Paso, TX. (25 min; September 12, 2020)

1. "Stationary Surfaces for Curvature Functionals" *63rd Texas Geometry and Topology Conference* (virtual), Texas Tech University, Lubbock, TX. (50 min; April 23, 2020)

Contributed Presentations

10. "Reversible and Irreversible Bracket-Based Dynamics for Deep Graph Neural Networks" *Minisymposium on Machine Learning on Graphs for Physical Sciences and Data Analysis*, SIAM Mathematics of Data Science, Atlanta, GA. (Poster; October 22, 2024)

9. "Property-Preserving Machine Learning of Metriplectic Systems" *Oden Institute Workshop on Scientific Machine Learning*, Austin, TX. (30 min; October 3, 2024)

8. "Flexible and Variationally Consistent Hamiltonian Model Reduction" *Model Reduction and Surrogate Modeling (MORe2024)*, La Jolla, CA. (30 min; September 10, 2024)

7. "Learning Metriplectic Systems from Full and Partial State Information" *Minisymposium on Geometric Mechanics Formulations and Structure-Preserving Discretizations for Continuum Mechanics and Kinetic Models*, 16th World Congress on Computational Mechanics, Vancouver, Canada. (20 min; July 23, 2024)

6. "Reversible and Irreversible Bracket-Based Dynamics for Deep Graph Neural Networks" *Advances in Neural Information Processing Systems*, New Orleans, LA. (Poster; December 12, 2023)

5. "Variational Consistency in Model Reduction for Conservative and Dissipative Systems" *Minisymposium on Data-Driven Methods—Solids, A Conference Celebrating the 80th Birthday of Thomas J.R. Hughes*, Austin, TX. (25 min; October 23, 2023)

4. "Canonical and Noncanonical Hamiltonian Operator Inference" *Minisymposium on Geometric Mechanics Formulations and Structure-Preserving Discretizations*, 17th U.S. National Congress on Computational Mechanics, Albuquerque, NM. (25 min; July 26, 2023)

3. "Canonical and Noncanonical Hamiltonian Model Reduction" *Workshop on Establishing Benchmarks for Data-Driven Modeling of Physical Systems*, University of Southern California, Los Angeles, CA. (30 min; April 6, 2023)

2. "Quaternionic Remeshing During Surface Evolution" *18th International Conference of Numerical Analysis and Applied Mathematics* (virtual), Rhodes, Greece. (30 min; September 17, 2020)

1. "Willmore-Stable Minimal Surfaces" *18th International Conference of Numerical Analysis and Applied Mathematics* (virtual), Rhodes, Greece. (30 min; September 17, 2020)

Invited Internal and Other Presentations

24. "Neural Architectures and Surrogates with Guaranteed Dynamical Behavior" *Sandia Center 1400 Town Hall*, Albuquerque, NM. (10 min; April 10, 2025)

23. "Neural Architectures and Surrogates with Guaranteed Dynamical Behavior" *Sandia Computing and Information Sciences (CIS) Research Foundation External Review Board (ERB) Meeting*, Livermore, CA. (Poster; March 11, 2025)

22. "Learning on Graphs with Bracket-Based Dynamical Systems" *SEA-CROGS MMICC 3rd Year Review* (virtual). (15 min; November 14, 2024)

21. "Hamiltonian Structure-Preserving ROMs" *M2dt MMICC 3rd Year Review* (virtual). (15 min; November 6, 2024)

20. "Flexible and Variationally Consistent Hamiltonian Model Reduction" *Sandia Fellows Day*, Livermore, CA. (15 min; July 30, 2024)

19. "Cohomology-Aware Model Reduction" *Sandia M2dt MMICC Meeting* (virtual), Albuquerque, NM and Livermore, CA. (45 min; June 25, 2024)

18. "Data-Driven Dynamical Systems with Structural Guarantees" *Applications in Algebra Working Group*, Sandia National Laboratories, Albuquerque, NM. (50 min; March 7, 2024)

17. "Learning Operators for Structure-Informed Surrogate Models" *DOE ASCR PI Meeting*, Albuquerque, NM. (Poster; January 8, 2024)

16. "SNL Progress Highlights: Data-Driven Couplings (RT3.1) and Preservation of Geometric Structure in ROM (RT2.2)" *M2dt MMICC All-Hands Meeting*, Oden Institute, University of Texas at Austin, Austin, TX. (20 min; October 25, 2023, w/ Irina Tezaur)

15. "Data-Driven Surrogate Models for Bracket-Based Dynamical Systems" *Sandia SEA-CROGS MMICC Meeting*, Albuquerque, NM. (50 min; October 11, 2023)

14. "Tensor Methods for Metriplectic Systems" *Sandia M2dt MMICC Meeting* (virtual), Albuquerque, NM and Livermore, CA. (25 min; May 16, 2023)

13. "ROM Ideas for Hodge-de Rham Systems" *Sandia M2dt MMICC Meeting* (virtual), Albuquerque, NM and Livermore, CA. (25 min; December 6, 2022)

12. "Hamiltonian Operator Inference with Examples" *Sandia M2dt MMICC Meeting* (virtual), Albuquerque, NM and Livermore, CA. (25 min; November 1, 2022)

11. "Structure-Preserving ROM Ideas" *Sandia M2dt MMICC Meeting* (virtual), Albuquerque, NM and Livermore, CA. (25 min; October 18, 2022)

10. "Variationally Consistent Model Reduction" *Sandia Fellows Day*, Albuquerque, NM. (20 min; August 29, 2023)

9. "Artificial Neural Networks for Dimension Reduction and Reduced-Order Modeling" *Applied Mathematics Group*, Texas Tech University, Lubbock, TX. (50 min; September 30, 2021)

8. "Some Nonlinear PDEs in Computer Graphics and Data Science" *Mathematics Colloquium Series*, Texas Tech University, Lubbock, TX. (50 min; September 29, 2021)

7. "Optimal Quasiconformal Mappings with Prescribed Boundary" *Probability, Geometry, and Mathematical Physics Group* (virtual), Texas Tech University, Lubbock, TX. (50 min; April 7, 2021)

6. "Geometric Flows via Finite Element Methods" *Elasticity Group* (virtual), Texas Tech University, Lubbock, TX. (50 min; December 2, 2020)

5. "Variational Aspects of Curvature Functionals" *Elasticity Group*, Texas Tech University, Lubbock, TX. (50 min; September 2, 2020)

4. "Computing Stationary Solutions to p-Willmore Flow" *Applied Mathematics Group*, Texas Tech University, Lubbock, TX. (50 min; April 22, 2020)

3. "A Conformally-Adjusted Willmore Flow of Closed Surfaces" *Applied Mathematics Group*, Texas Tech University, Lubbock, TX. (50 min; May 8, 2019)

2. "Curvature Functionals and p-Willmore Energy" *Analysis Group*, Texas Tech University, Lubbock, TX. (50 min; April 29, 2019)

1. "Active Manifolds: A Geometric Approach to Dimension Reduction for Sensitivity Analysis" *Computational and Applied Mathematics Group*, Oak Ridge National Laboratory, Oak Ridge, TN. (50 min; August 1, 2018)
